EXPERIENCE

THE SPARKS FOUNDATIONS | WEB DEVELOPMENT INTERN

April 2023 | Remote

- Developed a donation website having integrated payment gateway mechanism using Razorpay.
- Developed a simple banking web application to demonstrate transactions between multiple accounts.
- Both websites are responsive and were made using HTML, CSS, JavaScript, jQuery and Bootstrap.

PROJECTS

COLLEGE WEBSITE | Repository | Live-website

- Developed a modified version of college website.
- Some key features are embedded custom google maps from cloud console, image-carousels and a different design.
- Basic skeleton of the website was made using HTML, styling was done using CSS and it was made responsive using bootstrap elements.

TINDOG | Repository | Live-website

- It is creative/fun website based on the imaginary concept of Tinder for dogs.
- Basic skeleton of the website was made using HTML, styling was done using CSS and it was made responsive using bootstrap elements.

DRUMKIT | Repository | Live-website

- It is an online web application to play with drums and similar instruments.
- We may give inputs using either clicks or assigned keyboard buttons.
- Basic skeleton of the website was made using HTML, styling was done using CSS and functionality was added using JavaScript.

SIMON-GAME | Repository | Live-website

- It is a prototype based on the famous simon-game which is an electronic game of short-term memory skill.
- We need to remember the order of output-sounds linked to the four primary colors and input the same color/sounds in the correct order.
- With time speed increased and if we press a wrong button - game is over.
- Basic skeleton of the website was made using HTML, styling was done using CSS and logic was added using JavaScript.

DICE-GAME | Repository | Live-website

- It is a web application to simply roll the dice.
